Attachments: 2476.0001y193.ml.pdf; 2476.0001y194.ml.pdf

Hi Susan,

Attached are sample results from the concrete sampled for potential use as backfill.

My initial take on this is "no" on stockpiles 01A and 01B due to leachable fluoride. Stockpile 02 has an Arsenic level above the EPA RSLs but it is below Montana background levels. Please let me know your thoughts on this.

I have tasked Glencore with having their contractors make recommendations in writing before we respond. I was hoping to get your take on this prior to that.

These are only from rubled concrete from pot line one and there are 9 more to go.

Thanks
Mike

Subject: CFAC Crushed Concrete Sampling Results

Mr. Cirian,

Roux Associates, on behalf of CFAC, is providing the attached two letters which summarize the results of crushed concrete sampling from stockpiles 01 and 02 at the CFAC Site.

We would like to setup a conference call early next week to discuss these letters with the group. I am proposing Monday at 4pm EST, 2 pm MT. Please let me know if that works for everyone.
